On-site spray applicators

Colour+fast™ Metal Coatings

A range of specialist coatings for the on-site re-colouring and refinishing of internal and external metal sections.

shopfronts professional applications specialist coatings

General Information

Introduction

Sprayzone are the recognized market leaders in on-site spray application. Working exclusively within the commercial sector, sprayzone have developed a unique portfolio of specialist colour+fast coatings that provide an in-situ, cost effective and superior spray finish to key architectural surfaces.

Specialising in completing spraying projects within trading retail stores and occupied offices, sprayzone work in partnership with many leading retailers, construction companies and property professionals to complete contracts throughout the UK.

Applications

Principal applications are in the retail, industrial and commercial sectors. Typical projects are completed as part of a refurbishment programme, maintenance programme or dilapidation schedule of retail stores, offices and industrial units.

Surface Information

Factory coated metal sections are extensively used within the construction process to provide a durable and consistent finish. Although the factory applied coating has a long life expectancy, it will gradually degrade over time and a programme of regular maintenance is recommended to ensure optimum performance. Spraying of the framing may be completed at any stage of the buildings life cycle and may be for a number of reasons, including maintenance or colour change.

Specifying the correct paint system is critical to ensure surface compatibility and maximum life expectancy of the finished coating.

Coatings Information

Sprayzone have developed two cost effective coatings for the professional refurbishment of metal surfaces. Developed in association with leading paint manufacturers, the colour+fast branded coatings are specifically formulated for an on-site spray finish to all forms of:

- Aluminium Shopfronts
- Curtain Walling
- Automatic Doors
- Metal Staircases
- Radiator Casings
- Lift Doors

Colour+fast™ (AC-01) Aluminium Coating

Developed specifically for spray application on to existing aluminium sections, including powder coated, bronze anodised and satin anodised. This revolutionary coating has similar performance characteristics to factory applied powder coating, providing an extremely durable and colourfast finish. Applied by High Volume Low Pressure (HVLP) spray equipment to ensure a consistent and even surface finish, this professional quality coating is isocyanate free and ideal for safe application in both internal and external locations. With a diverse range of applications including shopfronts, curtain walling, windows and doors, this rapidly curing coating is the market leading choice for specifiers.

“ Sprayzone have successfully introduced the revised colour scheme on a number of stores, delivering a quality finish with the minimum of disruption to the normal trading routine.....we look forward to working with the sprayzone team on future store refurbishments. ”

Spray coating solutions for the construction industry

Colour+fast™ (MC-01) Metal Coating

Specifically formulated for on-site spray application, this professional quality coating provides the market leading coating solution for existing metal surfaces. Particularly suitable for the renovation and refurbishment of lift doors, radiator casings, staircases and balustrading, this smooth and durable enamel finish is effective in both internal and external environments.

Masking

Extensive masking is completed prior to commencement of the spraying process to ensure that adjacent walls, floors, furniture and stock are protected.

Application

Applied exclusively by sprayzone's own teams of fully trained applicators, specialist spray equipment is used to ensure a controlled and even surface finish. The two pack system consists of primer, undercoat and finish coat.

Programme

The majority of the work is completed out-of-hours to ensure minimal disruption to the normal working routine.

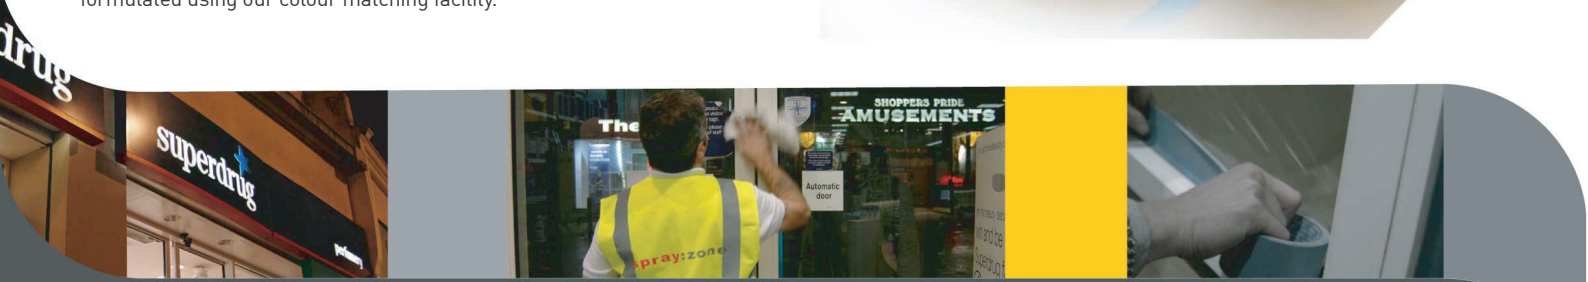

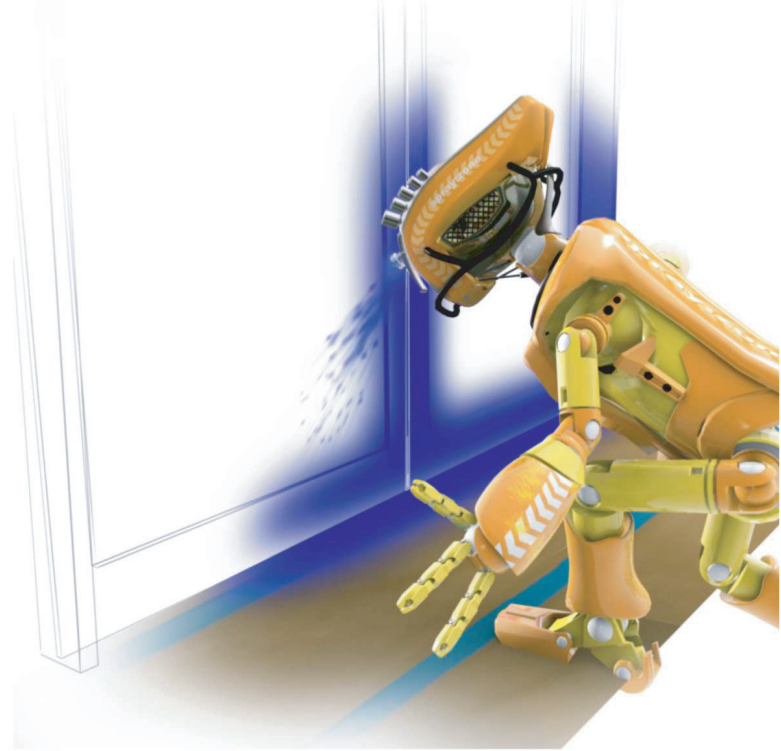

Access

High level projects are completed using access stilts, scaffold towers, self-propelled booms and scissor lifts. Operatives are fully trained and certified.

Colours

Available in a wide range of colours and gloss levels, including metallic. All coatings are manufactured to BS and RAL colour references or formulated using our colour matching facility.
